

Banking Data Analysis

Deep dive into term deposit subscription patterns.

Dataset Overview

- Total Records: 45,211
- Features: 17 attributes
- Target: Term deposit (yes/no)
- Period: May 2008 - Nov 2010

Call Duration Impact

Duration Finding

Optimal call duration: 5-10 minutes
Longer calls don't guarantee success.

Balance Distribution

Balance Insight

Median balance: €1,200

High balance = 23% higher conversion rate

Effort vs Success

Effort Recommendation

Focus on quality over quantity

Reduce calls to unqualified leads

Variance Analysis

Variance Observation

Q3 shows most consistent results

Standardize Q1-Q2 approach

Success Factors

Key Drivers

1. Contact duration
2. Previous campaign outcome
3. Employment status
4. Age group

Income Analysis

Income Strategy

Tailor products by income segment

Premium offerings for top 20%

Heatmap: Age vs Duration

Age-Duration Pattern

Middle-aged clients (35-55) most responsive

Duration less critical for this segment

Recommendations

1. Target 35-55 age group
2. Train agents on 5-10 min sweet spot
3. Prioritize high-balance segments
4. Standardize Q1-Q2 approach
5. Leverage employment data
